IPC 900 INTERNAL PIPECOATER 12" – 35"

PART NO. 0281-001

The IPC 900 Internal Pipecoater is designed to apply paint for pipe internal of diameters ranging from 8" to 35". The unit is attached to the end of a pipe lance connected to the high-pressure paint hose leading from a spray pump. An air hose is needed to connect to the IPC 900 unit as well. Once the IPC 900 is positioned within the pipe, regulate the paint and air flow to the correct pressure. The spray gun is triggered to begin the paint flow. The paint will be sprayed through a spin nozzle controlled by the air flow in a 360° spraying pattern. To stop IPC 900, release the spray gun trigger and shut off the air supply to the unit.
